SUMMARY

Senior Salesforce Developer with 7+ years architecting enterprise CRM solutions across Sales, Service, Experience, Commerce, and Data Cloud. Proven record of building scalable LWC/Apex applications and AI-powered features (Agentforce, Prompt Builder) for 10,000+ global users. 6x Salesforce Certified (including AI Specialist), with deep expertise in API integrations, automation, and CI/CD-driven delivery.

SKILLS

Languages:	Apex, JavaScript (ES6+), SOQL, SOSL, HTML, CSS
Salesforce Core:	Lightning Web Components (LWC), Aura, Visualforce, Flows, Triggers, Batch/Queueable/Scheduled Apex, Platform Events
Clouds:	Sales, Service, Experience, Commerce, Data Cloud
AI & Analytics:	Agentforce, Prompt Builder, Einstein AI, CRM Analytics
Integration:	REST/SOAP APIs, MuleSoft, Named Credentials, OAuth 2.0, Postman
DevOps & Tools:	SFDX, GitHub, CI/CD, Copado, Data Loader, Workbench, Agile Scrum

EXPERIENCE

Senior Salesforce Developer September 2024 - Present, Bangalore Volvo Group India Pvt. Ltd.

- Architected and built the Control Center application from the ground up — a single sign-on (SSO) portal unifying Customer Portal, Service Marketplace, Parts, and Aftermarket applications into one entry point used by 10,000+ dealers and customers globally.
- Implemented an event-driven architecture using Platform Events, decoupling the BALDO system from the Customer Database to enable near real-time data sync that eliminated 10 hours of manual reconciliation per week.
- Developed 25+ LWC, Apex classes, Flows, and triggers with 90% test coverage, cutting production defects by 45% while accelerating delivery through reusable components reused across 8 business workflows.
- Delivered an AI-powered account insights feature using Agentforce and Prompt Builder, surfacing critical account insights through automated summaries that reduced manual account-research time by 15 minutes per user per account.
- Designed a custom notifications framework surfacing contract approvals and survey-request alerts to 1,000+ users, improving response time on dealer survey requests by 30%.
- Spearheaded the Volvo Trucks CRM market launch across 40 global regions, owning data migration, security configuration, user-access setup, testing, and release activities to deliver a 100% on-time go-live.
- Drove end-to-end delivery across Agile Scrum sprints using GitHub, Copado CI/CD, SFDX, Splunk, and Postman for version control, API integration testing, and automated deployments — reducing deployment errors and cutting release cycle time by 25%.

Salesforce Developer April 2022 - September 2024, Bangalore Accenture Solutions Pvt. Ltd.

- Engineered a reusable Framework API using Apex REST for real-time cross-org data synchronization, achieving 99.8% uptime over 24 months and supporting 10,000 transactions/day across 4 Salesforce environments.
- Built 3 enterprise integrations, including a secure Payment Gateway via REST APIs, and embedded Google Maps into Lightning pages to surface store locations, sales performance, pricing, and offers.
- Developed 12+ LWC, Aura Components, Apex classes, triggers, and REST/Batch classes with 90%+ code coverage, delivering scalable solutions that simplified complex business processes.
- Designed automation frameworks using Apex, Flows, Batch Apex, and asynchronous processing, reducing manual effort by 35%.
- Established a source-driven CI/CD pipeline across multiple Salesforce orgs, automating testing and validation to drive deployment failures to near zero, and secured data access via role hierarchy, profiles, permission sets, and sharing rules.

Salesforce Developer June 2019 - April 2022, Bangalore Wipro Ltd.

- Built an Order Management and Discounting module in Sales Cloud for a pharmaceutical client, supporting order-processing workflows for 5,000+ sales users.
- Integrated Salesforce with SAP (inbound and outbound) through MuleSoft and Apex REST callouts, synchronizing customer, order, and product data in near real time.
- Delivered 35+ interactive dashboards and custom reports, giving stakeholders business insights and performance visibility for data-driven decisions.
- Optimized Apex performance and scalability by enforcing bulkification across 30+ Apex classes, cutting batch processing time by 40% and eliminating governor-limit exceptions at enterprise data volumes.
